DETAILED ACTION

Allowable Subject Matter

Claims 1 – 24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 1, 17 and 24:

Hickernell (US '457) shows a surface acoustic wave filter comprising series-arm and parallel-arm resonators in a ladder structure but does not show where each electrode finger of the interdigital transducer of at least one of the series-arm resonators has non-crossing parts 1.5 to 4.5 times as long as the electrode finger pitch of the interdigital transducer where Hickernell does not show non-crossing electrodes such as shown in Applicant's Fig. 12. Bergman et al. shows non-crossing electrodes but does not show the non-crossing parts 1.5 to 4.5 times as long as the electrode finger pitch of the interdigital transducer.

Claims 2 and 22:

Hickernell (US '457) and Inose do not show where at least one of the series-arm resonators, except the series-arm resonators located at the first and last stages, has a greater static capacitance than the average of the static capacitance of the other series-arm resonators. Hickernell shows static capacitance C_0 where the first and/or last series arm resonators has a higher static capacitance than the middle series-arm resonators where Inose shows a decrease in frequency of each successive series resonator but does not does not teach static capacitance.

Claims 3 and 23:

Reasons for allowance of the claims were given in the previous Office action dated January 14, 2005.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean O. Takaoka whose telephone number is (571) 272-1772. The examiner can normally be reached on 8:30a - 5:00p Mon - Fri.
